2020 Application Guidelines

Please note applying for the Inhibitor Summit does not guarantee acceptance into the program.

Preference is given to those with an active inhibitor. Attendance will be prioritized based on the parameters outlined below:

- Priority: Individuals who would-be first-time attendees.
- Second priority: Individuals who are returning attendees. Priority will be based on recent attendance with an active inhibitor at the summits. (Example: Person A attended last year, Person B attended two years ago, priority will be given to Person B)

If the person in your family with an inhibitor is 17 years of age and younger, you may register:

- The affected child (17 years of age and younger with an inhibitor) and,
- Up to two of your child’s primary caregivers (including yourself) and,
- The affected child’s siblings that live with them.

  O Siblings 18+ may not attend unless they are one of the primary caregivers.

  O If any of the siblings have children of their own, the siblings and their children are not eligible to attend.

If the person in your family with an inhibitor is 18 years of age and older (a legal adult), they may bring either:

- You may bring one adult (spouse, significant other, friend, caregiver—does not have to live with them). This person must be involved in your day to day care.

  O Please note that each affected adult will only be allowed one hotel room (two beds).

- If the affected adult has children that live with them, they may bring all their children under the age of 18., but only 1 additional adult support person (spouse, for example).

  O If the affected adult has children that live with them, please note that they will only be allowed up to two hotel rooms.

- *NEW* All affected persons 18+ MUST speak directly with NHF staff to confirm their/family’s registration details via confirmation call. No exceptions will be made unless there is a medical reason that would prevent the affected person from completing the process.

*Please note each affected person and their family is permitted to attend one summit per year, either May National Inhibitor Summit, October National Inhibitor Summit or Viviendo con Inhibidores. No exceptions will be made.
